

Help us improve public health:

Join our COVID-19 vaccine study at your local participating Walgreens pharmacy

Are you or your child (ages 3 and older) getting a Pfizer-BioNTech or Moderna COVID-19 vaccine?

If so, you or both of you may qualify to participate in a research study that could help shape the future of public health.

What's Involved?

- **5 Short Visits:** Attend five visits over the course of one year at your local participating pharmacy.
- **Blood Draws:** At each visit, we'll take about 1.5 teaspoons of blood to study how the vaccines protect people.
- **Weekly Surveys:** Complete a short online questionnaire (about 5 minutes) each week.
- **Extra Visits:** If you or your child develop COVID-19 symptoms or are exposed to someone with COVID-19, you may be asked to return for a COVID-19 test free of charge.

Why Participate?

- **Convenient:** Participate during your regular pharmacy visits.
- **Important:** Your participation helps researchers learn more about vaccine effectiveness, which can improve future public health responses.
- **Compensation:** Earn up to \$275 for your time and effort over the course of a year.

Do You Qualify?

- Aged 3 years or older
- Received a Pfizer-BioNTech or Moderna COVID-19 vaccine in the last 72 hours
- Plan to receive a Pfizer-BioNTech or Moderna COVID-19. *You may be eligible to receive a no-cost COVID-19 vaccination. Please contact us to learn more.*
